

# Rollaco Presses

## Boxer series

- Type of Print** - Etchings, drypoint, collographs, linocuts and woodcuts
- Bed size** - One size 50 cm x 91 cm x 10mm -
- Weight** - 120kgs
- Construction** - All steel fabricated construction with a high strength solid industrial composite bed, which is fitted with safety stops. Rollers are made from heavy gauge steel tube with upgraded centre shafting, which is machined to a fine tolerance. For a easy ,controlled operation extra heavy duty ball bearings are used throughout the machine. Top roller diameter is 107mm and bottom roller diameter is 100mm. The press is finished in a synthetic hammer effect paint.
- Gearing** - For a smooth controlled and easy operation gearing is fitted. The gear ratio for this press is 11.3 :1. For safety all gears are fitted with a guard.
- Adjustment** - By toggle bars at each side of the press, which allows the top roller to be raised or lowered easily. With the top roller in the raised position a gap of 25mm can be achieved.
- Mounting** - This press is designed as a studio model and comes with its own integral steel stand with levelling feet.
- Maintenance** - None other than the protection of bare metal surfaces when the press is kept in a damp or unheated environment.
