

Rollaco Presses

Classic series

- **Type of Print** - All intaglio/ etchings, engravings and woodcuts.
All relief, linocuts and collographs.
- **Bed size and Weight** - One size 40 cm x 81 cm x 10mm - 50 kgs.
- **Construction** - Side frames are cast in a high strength aluminium alloy while all other components are made of steel. Rollers are made from heavy gauge steel tube with centre shafting, which are machined to a fine tolerance before being polished. For a easy ,controlled operation heavy-duty ball bearings are used on the drive mechanism. Beds are made of an industrial grade composite which has a proven record for ease of handling, maintenace and reliability. All beds have safety stops fitted. The press is finished in a hammer effect paint. Top roller diameter is 106 mm and bottom roller diameter is 88 mm.
- **Gearing** - For a smooth controlled and easy operation gearing is fitted. The gear ratio for both presses is 4:1. For safety all gears are fitted with a guard.
- **Adjustment** - By toggle bars at each side of the press, which allows the top roller to be raised or lowered easily. With the top roller in the raised position a gap of 25 mm + can be achieved.
- **Mounting** - Can be mounted on workbenches or tables easily.
- **Maintenance** - None other than the protection of bare metal surfaces when the press is kept in a damp environment.
