

Rollaco Presses

Kudos series

- **Type or print** - All intaglio/ etchings, engravings and woodcuts.
All relief , linocuts and collographs.
- **Bed size** - Two sizes 40 cm x 81 cm x 10mm - 70 kgs
45 cm x 81 cm x 10mm - 76 kgs
- **Construction** - All steel welded construction with a high strength industrial grade composite bed, which is fitted with safety stops. Rollers are made from heavy duty steel tube which is machined to a fine tolerance then polished. For easy operation heavy duty ball bearings are used throughout. Top roller diameter is 106mm. Bottom roller diameter is 88mm. Drive is via a star wheel with removable spokes. Options of a stainless steel rim wheel or a crank handle are available. The G10 composite is without equal as a bed material, impervious to chemical attack, easy to clean, strong, lightweight compared to steel, and has a guarantee of conformity for life.
- **Gearing** - Fitted on all sizes with a ratio of 5:1 for easier use. Guards fitted.
- **Adjustment** - Toggle bars are fitted to both sides of the top roller bearings and are able to control the top roller accurately for precision work.
A gap above the bed of 25mm is achievable .
- **Mounting** - On suitable tables, benches or optional made to measure stands.
- **Maintenance** - None, bearings are pre-packed with grease and are capable of many years normal service. As with all presses bare metal surfaces need to be protected in damp environments.
